Deliverable No.	AEROFLEX D8.4	
Deliverable Title	Final Exploitation Plan	
Deliverable Date	2020-11-30 M38 (due M34)	
Deliverable Type	REPORT	
Dissemination level	Confidential – member only (CO)	
Written By	Annemarie Mahieu (UNR)	2021-09-17
Approved by	All Industry and OEM's of the project Ben Kraaijenhagen (UNR) - Technical project co-coördinator	2021-09-22
Status	FINAL	2021-09-23

Publishable Executive Summary

This deliverable outlines the final version of the AEROFLEX Exploitation Plan (D8.4). It is based on the Grant Agreement regarding the AEROFLEX project and explains the methodology behind the exploitation of results that has been achieved during the project. A list of exploitable results is part of this deliverable.

This Exploitation Plan includes the following objects:

- Main objectives and responsibilities
- Target Group and Key actors
- Levels of exploitation and exploitable components
- Communication channel and tools
- Exploitation seminar
- A final list of results achieved within the project, along with the corresponding partners
- Means of exploitation
- A timeline for the exploitation of each result
- IPR protection measures.

This Final Exploitation Plan has been updated on a regular basis during the project lifetime, accordingly to the findings and the project progress. This final version was planned to submission in project month 34, but internally delayed in order to consider the most of the exploitable results and the findings of the support of the Horizon Results Booster (HRB, www.horizonresultsbooster.eu), an initiative funded by the EC.
